

Programming Competition Brought To You By The IT Standards Committee

So mark your calendar to attend this exciting event!

Want to get your programming skills up to speed, have lots of fun, learn cool tips and tricks from programming experts and win attractive prizes? Participate in code::Xtreme::Apps::

What ?

The IT Standards Committee (ITSC) is organizing its first programming competition called code::XtremeApps::, a 24-hour round-the-clock programming competition aimed at fostering Singapore's computer programming environment, promoting programming as an essential aspect of using information technology and demonstrating how it can enhance everyday life – at work or at play.

Using the latest technologies like Ruby on Rails, Google Gadget and Google Toolkit, you will get to build cool applications and applets that are both useful and fun. If you are unfamiliar with these tools, don't worry! Training will be provided.

Who?

code::XtremeApps:: promises to be an exciting and fun-filled affair open to secondary schools, junior colleges, technology institutes, tertiary institutions, and IT industry professionals. The top winning team gets to visit Google's headquarters in the United States and the 1st and 2nd runners-up stand to win close to \$10,000 in cash prizes.

When?

- Launch of code::XtremeApps::
Date: 15 August 2007

About The Organiser

The Information Technology Standards Committee (ITSC) was formed in 1990, under the purview of the Standards Council appointed by SPRING Singapore. It is an industry-led effort made up of volunteer members from the industry, but supported by SPRING Singapore and IDA Singapore. It is a neutral and open platform for interested industry and government parties to come together to

agree on technical standards. ITSC is also the national representative to international standards forums.
